

Our Company

Our Mission…Providing Superiority in the Battle Space through Seamless Distribution & Application of Information

Prescient Systems and Technologies (Prescient) is one of the leading systems providers in Asia Pacific. Our world-class capabilities combine key in-depth skills and experience in, real-time systems and network technologies, to provide cutting-edge training solutions for defence and industrial markets.

Prescient is transforming military and business operations with its network-centric, capability-driven solutions, to address a rapidly changing world. Identifying, planning and developing advanced next generation concepts, Prescient approaches the development of new ideas in an entrepreneurial fashion and identifies new capabilities for future market needs.

Prescient is also a leader in the development of core technologies for use in situational awareness systems, mission planning systems and airbourne communications. We provide network solutions by combining military aircraft, missiles, defence and communication systems, defence electronics, and related services. Linking all relevant resources, these activities guarantee interoperability across the tri services.

Delivering the training edge, we have designed and developed the world’s first range-less Advanced Air Combat Manoeuvring Instrumentation (AACMI) and Naval Combat Manoeuvring Instrumentation (NCMI) systems. We create value by delivering higher reliability, comfort, and safety in live training.

Prescient is an associate company of Singapore Technologies Electronics Limited, which is part of a leading, public-listed, integrated global engineering group– Singapore Technologies Engineering which has a turn over of S\$3.3 billion (FY2005).
