

## Training Centre

We have established several key full fledged training academies for our customers in Asia. Our role in these programs is providing turnkey financial, technical and program management in the selection, implementation, operation and maintenance of training systems, tailored to meet the specific needs of each institute.

Our development initiative, the Clark Institute of Aviation, first of its kind, world class international aviation training academy in Asia, trains commercial pilots for major carriers in the Philippines and the region. Our bold initiatives place us in the confidence of leading authorities to engage our expertise and services. Aviation Training Centre
